

**Why use Church Management Solution (CMS)?**  
Technology is our future. The internet has far exceeded the expectations of the industry. The church community must realize this and invest in the future. Most churches use software that is only accessible at the office by a limited number of users. This limited access also limits church communication. CMS allows unlimited authorized users to have access 24/7 anywhere the internet is accessible. This allows information to be managed more by doing less.

**Is Church Management Solution Affordable?**  
We are a Christian based business. God has given us gifts to use for kingdom building, and that is our focus. This allows us to focus on building tools for the kingdom to help glorify God. You can pick and choose the package that will suit your needs and you can always add additional modules at any time. When we upgrade or add to a module, there are no additional fees, only additional tools for you to use.

**Will we need special training?**  
Gospel Expo's CMS manual and help features are available online. We believe our solution is so easy to use that we do not require you to purchase training; however, training is available if needed for a small compensation fee.

**Can Gospel Expo provide a demo of the CMS?**  
Yes, if you would like to use our demo site, call us to get access. A portion of our church membership module is available for use. If during the trial period you decide to join Gospel Expo's community, you will receive a month free.

**Can we create our own solution?**  
The likelihood of a church being able to maintain a full-time IT department is not realistic. Although some churches have moved the typewriter to the back office and added a computer or two for the administrative staff, most churches shun away from the cost associated with an in-house IT department. Even though the average church has a majority of members that use the internet daily in their work and personal lives, most churches still have not entered into the world of IT. Remember outsourcing can be a good thing. Gospel Expo provides the broad range of IT expertise required for successful IT solutions. Technology is only as good as the quality of the information being managed. Gospel Expo lets you manage the ministry, while we manage the IT.

*Computer  
Web browser for your computer*

*Internet connection*

Gospel Expo's CMS uses SSL (Secure Sockets Layer) which is a secure communications protocol that encrypts all data communications over the network. Combined with CMS authentication features and network firewalls, we protect your data 24/7.

## **Benefits of Online Church Management**

Become a Church without walls! Allow access to church data from anywhere there is an internet connection allowing designated users to login from anywhere, at anytime.

Provide better Time Management - Manage your Ministry and not your paperwork. CMS can decrease duplication and increase the productivity of every member, staff, and volunteer of your church.

Decrease workload and increase ministry output - communication is now on a two-way street.

Open Communication with your congregation 24/7. Meet the online demands/expectations of membership.

Provide an events calendar for the church, volunteers and staff. Schedule or Cancel meetings with minimal effort and maximum member notification.

Increase Volunteer/Ministry participation. Provide management and marketing tools to help ministry leaders get members plugged into ministry news, activities and events. Keep track of your volunteer pool as well as membership involvement.

Reduce the Risk with added security check-in for facilities. Secure check-in procedures and process for all children with our childcare modules.

Provide ministry leaders with access to specific online services to help with the development of ministries and volunteers.

Encourage member economic empowerment - Provide member business directory to congregations.
